EDUCATION

Holberton School, San Francisco — *Full Stack Engineer*

JANUARY 2016 - PRESENT | www.holbertonschool.com

Student at Holberton School, a project-based alternative to college for the next generation of software engineers.

City College, San Francisco — *A.S in Network Security*

SEPTEMBER 2011 - JUNE 2015

- Network Security Certificate, June 2015
- Cybersecurity Certificate, June 2015

EXPERIENCE

Geek Squad, San Francisco — *Agent*

OCTOBER 2015 - JANUARY 2016

Excelled as a quick learner, quick thinker, and resourceful, knowledgeable, and hard-working agent. Helped many customers remove viruses, configure systems and troubleshoot a wide variety of devices.

Self Employed, San Francisco Bay Area — *IT Specialist*

JUNE 2011 - JUNE 2015

Freelance system configuration (printer set-up, troubleshooting, network problems).

PROJECTS

Word-Runner — *Web App, Bootstrap, Golang*

Helped create a wikirace implementation using Go for concurrency and Bootstrap for fast front-end development. Six person team for a 6 hour commando project.

HOShell — *Shell, C*

Created a functional simple shell in C with built-in commands as part of 2 person team.

Deep Whaling — *Deep Learning, Python, Docker*

Created a web interface for Keras, a deep learning library for Python and integrated it all in a Docker container. Two person team for a Docker sponsored 10 hour Hackathon.

Ventlog — *Bootstrap, HTML, CSS, JavaScript, PHP*

Created a mock twitter clone / social media website.
